François Forrer

ELECTRONIC COMPUTER ENGINEER, SPECIALISED IN EMBEDDED SYSTEMS

With two years of experience in the electronic computer field in India, I am seeking a position as Project Manager, PCB designer or Industrialization Specialist.

Bilingual and passionate about new technologies, I aim to create innovative tools that improve daily life. My dynamic and positive attitude, coupled with a strong ability to identify challenges and deliver effective solutions, makes me an adaptable professional ready for challenges.

Work Experience

- Alten (consulting company) | Rouen, France** 2025
Engineer at Thalès as Series Product manager since April
Solved electronic card assembly production problems by acting as a link between production, supplier communications managers, technologists and logisticians
- STMicroelectronics | New Delhi, India** 2023 - 2024
Embedded systems engineer for 2 years
Worked in an analog electrical characterization Lab
 - Automated tests on FPGA boards using Verilog
 - Automated test reports in Excel and Word using VBA
 - Performed analog tests on new internal technologies
- CODIUM Electronique (startup electronic design) | Langres, France** 2022
Production operator for 2 months
 - Set up the process for the company's first PCB design chain
 - Used and verified the bed of nails tester developed during the internship**Embedded systems intern, test bench designer** for 6 months
 - Designed and implemented a bed of nails test bench for PCBs
 - Designed and created internal PCBs to test various IPs
 - Repaired, soldered, and tested PCBs to ensure full functionality
- INRAE (national research institute for agriculture) | Dijon, France** 2021
Electronic computer intern for 3 months
 - Extended and improved the performance of a weather sensor park within a greenhouse
 - Created and installed new enclosures to house all sensors
 - Updated the database acquisition system using Raspberry Pi boards

Education

- ESIREM Engineer School | Dijon, France** 2021
Master's degree as electronic computer engineer specialised in embedded systems
- University Institute of Technology | Le Creusot, France** 2019
Bachelor's degree in physical measurement specialised in material and physicochemical controls
 - Third semester carried out within "UTP" in Malaysia

Association and projects

EEUDF Scout | Le Creusot, France

BAFA (french youth work diploma)
2019

Scout unit leader position

2018 - PRESENT

- Developed and managed the unit's educational project
- Coordinated a team of scout leaders
- Assisted a camp leader 2 times

Scout leader position

2017 - 2022

- Supervised and managed several children and teens in educational and recreational activities as part of a teaching team

Completed projects

2017 - 2021

- Application connecting simultaneously several speakers from different brands
- Synthesizer** fully analogic
- Tool aimed at detect falls and help fragile persons
- Speaker able to regulate automatically its sound volume and its extinction
